For over thirty years, the Waldorf Early Childhood Association of North America has been creating resources that aim to deepen our understanding of the young children in our care, and provide practical and artistic approaches to our work with them. We are proud of the rich array of publications that we have produced, and hope that you will find them both inspiring and useful.

Our publications are drawn from a variety of sources, and take many different forms: collections of articles previously published in the WECAN newsletter; lectures at national and international conferences; compilations of extracts from the work of Rudolf Steiner; translations of books originally published in other languages; collections of stories, songs, verses, gesture games, and other artistic material; and original works from individual authors.

Purchasing from our online store is the best way to directly benefit WECAN and support our publication program, which is made possible by a generous grant from the Waldorf Curriculum Fund.
